Segregation of duties and role conflict matrix should be implemented for all kinds of user access and privileged-access roles in the cloud-hosted application irrespective of the cloud service model. Access provisioning should be governed by principles of 'need to know' and 'least privileges'. In addition, multi-factor authentication should be implemented for access to cloud applications.

Security Controls: Service Provider shall ensure that the implementation of security controls in the cloud-based application achieves similar or higher degree of control objectives than those achieved in/ by an on-premise application. This includes ensuring - secure connection through appropriate deployment of network security resources and their configurations; appropriate and secure configurations, monitoring of the cloud assets utilised by IFCI. Necessary procedures to authorise changes to cloud applications and related resources.

Robust Monitoring and Surveillance:

- i) Service Provider maintains an information security policy framework commensurate with its exposures to vulnerabilities and threats.

- ii) Service Provider is able to maintain its information/ cyber security capability with respect to changes in vulnerabilities and threats, including those resulting from changes to information assets or its business environment.
- iii) Nature and frequency of testing of controls by the CSP in respect of the outsourced services is commensurate with the materiality of the services being outsourced by IFCI and the threat environment.

Appropriate integration of logs, events from the Service Provider, wherever applicable and/ or retention of relevant logs in cloud shall be ensured for incident reporting and handling of incidents relating to services deployed on the cloud.

The IFCI's own efforts in securing its application shall be complemented by the Service Provider's cyber resilience controls. The Service Provider / IFCI shall ensure continuous and regular updates of security-related software including upgrades, fixes, patches and service packs for protecting the application from advanced threats/ malware.

Vulnerability Management: Service Providers ensure to have a well-governed and structured approach to manage threats and vulnerabilities supported by requisite industry-specific threat intelligence capabilities.

Disaster Recovery & Cyber Resilience

In the event of a disaster affecting its cloud services or failure of the Service Provider, IFCI can continue its critical operations with minimal disruption of services while ensuring integrity and security.

Service Providers put in place demonstrative capabilities for preparedness and readiness for cyber resilience as regards cloud services in use by them. This should be systematically ensured, inter alia, through robust incident response and recovery practices including conduct of Disaster Recovery (DR) drills at various levels of cloud services including necessary stakeholders.

- (a) The exit strategy and service level stipulations in the SLA shall factor in, inter alia,
 - (i) agreed processes and turnaround times for returning the IFCI's service collaterals and data held by the Service Provider.
 - (ii) data completeness and portability.
 - (iii) Secure purge of IFCI's information from the Service Provider's environment.
 - (iv) Smooth transition of services
 - (v) Unambiguous definition of liabilities, damages, penalties and indemnities.
- (b) Monitoring the ongoing design of applications and service delivery technology stack that the exit plans should align with.
- (c) Contractually agreed exit / termination plans should specify how the cloudhosted service(s) and data will be moved out from the cloud with minimal impact on continuity of the IFCI's business, while maintaining integrity and security.
- (d) All records of transactions, customer and operational information, configuration data should be promptly taken over in a systematic manner from the Service Provider and purged at the Service Provider -end and independent assurance sought before signing off from the Service Provider.
- (e) Non-disclosure agreement shall be executed by both parties with respect to information retained by the service provider before start of contract.
